Bangalore, India

PROFESSIONAL SUMMARY

B.Tech Computer Science (Big Data Analytics) student at SRM Institute of Science and Technology with hands-on experience in software development and data analytics. Achieved Top 1% rank (34/4600+) in a national-level hackathon and contributed to a YOLOv11-based surveillance research project. Proficient in Python, Java, C/C++, SQL, HTML, CSS, JavaScript, React, with working knowledge of Pandas, NumPy, and Power BI. Seeking a Data Analyst or Software Engineering internship.

EDUCATION

- SRM INSTITUTE OF SCIENCE AND TECHNOLOGY** 2024-2028
B.Tech in Computer Science and Engineering (Big Data Analytics) Chennai, India
 - CGPA: 8.83/10.00
- ST ANDREWS SCOTS SR SEC SCHOOL** 2020-2021
CBSE-Class 10 Delhi, India
 - Percentage: 85.8%

SKILLS

- Programming Languages:** Java, Python, C/C++, HTML5, CSS3, JavaScript, MySQL
- Miscellaneous:** Power BI, NumPy, Matplotlib, Pandas, Seaborn, Django, Web Development, Microsoft Office, Data Structures and Algorithms, Object Oriented Programming, Database Management Systems, Operating Systems
- Developer Tool:** Git, VS Code, Google Colab, Notepad++, SQL
- Languages:** English, Hindi, German

EXPERIENCE

- Research Intern – UROP (Undergraduate Research Program)** 2025-2026
 - Benchmarked 5+ object-detection architectures (YOLO v5-v8, Faster R-CNN) against camouflaged-object datasets, quantifying a ~23% mAP gap in low-contrast military scenarios — gap that motivated the entire research direction.
 - Engineered a YOLOv11-based detection framework with custom attention heads for low-contrast military targets; proposal accepted into the program and currently under implementation.
 - Produced a structured literature review spanning 15+ papers, cutting future researcher onboarding time by an estimated 40%.

PROJECTS

- GigShield AI — Full-Stack Insurance Platform** | React, Node.js, Flask, scikit-learn Mar - Apr 2026
Guidewire Hackathon | Rank 34 / 4600+ Teams (Top 1%)
 - Engineered a full-stack platform for gig workers enabling automated income-loss payouts using real-time weather data.
 - Designed a 3-tier system: React frontend, Node.js (Express) API, and Flask-based ML service for risk & fraud scoring.
 - Utilized OpenWeatherMap API with caching and automated claim triggers based on weather thresholds.
 - Implemented JWT authentication, role-based access control, and secure payment integration (Stripe).
 - Built a fraud detection system using multi-signal scoring and trained a Random Forest model for risk prediction.
 - [Live Demo](#)
- Echoes of the Cosmos – Space Education Platform** | HTML, CSS, JavaScript, Node.js Jun - Jul 2025
 - Developed a responsive space-themed educational website with responsive UI across 5+ device screen sizes.
 - Created 10+ interactive frontend components using JavaScript and CSS animations to enhance user experience.
 - Implemented a lightweight Node.js backend to handle routing and improve content delivery.
 - Leveraged APIs (NASA, SpaceX) to display real-time space data.
 - Deployed the application via GitHub Pages and managed version control using Git.
 - [Live Demo](#)

CERTIFICATIONS

Full Stack Web Development | Apna College — *HTML, CSS, JavaScript, backend basics* | [View Certificate](#)
Advanced Software Engineering Virtual Experience | JPMorgan Chase & Co. — *Backend systems, dev workflows* | [View Certificate](#)
Data Analytics Virtual Job Simulation | Deloitte (Forage) — *Data analysis, dashboards, business insights* | [View Certificate](#)
AI Fundamentals | IBM SkillsBuild — *ML concepts, neural networks* | [View Certificate](#)
Cyber Security Virtual Experience | Deloitte (Forage) — *Security frameworks, risk analysis* | [View Certificate](#)
Power BI Certification | Microsoft — *Data visualization, interactive dashboards* | [View Certificate](#)
Microsoft Excel | Coursera — *Advanced formulas, data handling* | [View Certificate](#)
