Bangalore, India

PROFESSIONAL SUMMARY

B.Tech Computer Science (Big Data Analytics) student at SRM Institute of Science and Technology with hands-on experience in software development and data analytics. Top 1% finisher (Rank 34 of 4,600+ teams) in a national hackathon. Built full-stack projects using React, TypeScript, Node.js, Express, Flask and SQL, including SpendWise Pro and DevProof. YOLOv11 research. Seeking SDE / Data Analytics internship roles where I can ship fast and learn faster.

EDUCATION

- **SRM INSTITUTE OF SCIENCE AND TECHNOLOGY** *2024-2028*
  B.Tech in Computer Science and Engineering (Big Data Analytics) | CGPA: 8.98/10.00 Chennai, India
- **MANAV RACHNA INTERNATIONAL SCHOOL** | CBSE-Class 12 *2023-2024*
- **ST ANDREWS SCOTS SR SEC SCHOOL** | CBSE-Class 10 *2020-2021*

SKILLS

- **Languages**: Python, C, C++, Java, JavaScript, TypeScript, SQL, HTML, CSS
- **Frameworks and Libraries**: React.js, Node.js, Express.js, Flask, Tailwind CSS, Pandas, NumPy, Matplotlib, scikit-learn
- **Data and Analytics**: Power BI, Data Analysis, Data Visualization, Machine Learning
- **Tools and Platforms**: Git, GitHub, Docker, CI/CD, VS Code, Google Colab, Vite, Prisma, PostgreSQL
- **Core CS**: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

EXPERIENCE

Frontend Developer Intern | BrainMint Pvt. Ltd. *May 2026 – Present*

- Decreased UI load time by ~30% by refactoring component architecture in React and enforcing code quality standards via peer review and ESLint-based linting pipelines.
- Accelerated feature delivery by 2 sprints by building modular, reusable frontend components and integrating them into a CI/CD workflow using GitHub Actions.
- Improved cross-device usability by 25% by building responsive interfaces across 5+ breakpoints in an agile team of 6.

Research Intern – UROP | Department of CSE, SRMIST *2025-Present*

- Identified a ~23% mAP performance gap in low-contrast military scenarios by benchmarking 5+ object-detection architectures (YOLOv5–YOLOv8, Faster R-CNN) against a custom evaluation dataset.
- Lowered false-negative detection rate by engineering a YOLOv11-based framework (CAM-YOLO11) with custom attention mechanisms; proposal accepted for full implementation.
- Cut future researcher onboarding time by 40% by producing a structured literature review of 15+ papers, organized by methodology and dataset type.

PROJECTS

SpendWise Pro — AI-Powered Full-Stack Financial Intelligence Platform | React, Node.js, MySQL, Flask, ML Live Demo

- Architected a 3-tier production system (React + Node.js/Express + MySQL + Flask ML service) featuring expense tracking, budgeting, analytics dashboards, and AI-driven financial insights.
- Reduced budget deviation by ~18% in user testing by shipping ML-powered spend forecasts, financial health scoring, anomaly detection, and an AI chatbot delivering personalized financial recommendations from live transaction data.
- Secured 100% of sessions via JWT auth, email verification and role-scoped access control with zero auth issues.

DevProof — Evidence-Based Developer Intelligence System | React, TypeScript, Node.js, PostgreSQL, Prisma Live Demo

- Built a developer analytics tool across 3 layers (React frontend, Node.js/Express backend, PostgreSQL database) that consolidates GitHub repository data into skills, coding activity and achievements.
- Developed 4 analytics modules (Repository Intelligence, Developer 360, Skills Analysis, Problem-Solving Insights) using React, TypeScript, Tailwind CSS and Framer Motion, with interactive, animated views for each module.
- Secured user data with 2 auth layers: GitHub OAuth and JWTs in HTTP-only cookies protecting API endpoints.

GigShield AI — Full-Stack Insurtech Solution | React, Node.js, Flask, scikit-learn Live Demo

Guidewire Hackathon | Rank 34 of 4,600+ teams (Top 1%)

- Engineered a 3-tier system (React + Node.js/Express + Flask ML service) automating income-loss payouts for gig workers using real-time weather triggers via OpenWeatherMap API.
- Flagged fraudulent claims before payout using a Random Forest model with multi-signal scoring on every claim.
- Implemented token-based auth, role-based access control and Stripe payments for a secure end-to-end claims workflow.

CERTIFICATIONS

AWS Certified Developer – Associate | Amazon Web Services (AWS) — *AWS application development, deployment, security* | View Certificate
AWS Certified AI Practitioner | Amazon Web Services (AWS) — *AI/ML concepts, generative AI, foundation models* | View Certificate
AWS Certified Cloud Practitioner | Amazon Web Services (AWS) — *Cloud concepts, AWS services, security, pricing* | View Certificate
Advanced Software Engineering Virtual Experience | JPMorgan Chase & Co. — *Backend systems, dev workflows* | View Certificate
Data Analytics Virtual Job Simulation | Deloitte (Forage) — *Data analysis, dashboards, business insights* | View Certificate
AI Fundamentals | IBM SkillsBuild — *ML concepts, neural networks* | View Certificate
Full Stack Web Development | Apna College — *HTML, CSS, JavaScript, backend basics* | View Certificate
